

How to find a Primary Care Doctor for the Blue Advantage HMO network

- To pick a new doctor, go to www.bcbstx.com - Click **Find a Doctor**
- From the **Network Type** drop down list, choose **Blue Advantage HMO**
- Below that, from the **Provider Type** drop down list choose **Primary Care Practitioners**
- Then you can use the filters below the search fields to narrow your search in several ways.
- Once you have the doctor picked out on the list, click on their name and look for their **PCP #** under their name on the top left. That is the number you need to provide to Blue Cross to make the change. If there is no PCP#, you cannot have this doctor as your primary care doctor. Go back and make sure you choose Primary Care Physicians from the Provider type drop down list box.

NOTE – if you search by name, use only the last name and it must be spelled exactly as the doctor is registered with Blue Cross or they will not show up so be careful. If not found, you can double check by not putting a name but enter their city or office zip code in the **Location** box then hit FIND. Then on the results list, click the first letter of their last name and look there.

Email me the name and PCP# for the doctor and I'll get it changed for you. Call me if you have any questions.

Thanks,

Shane
